

How do you install solar panels on a flat roof?

Instead of drilling into the roof to attach the solar panels, installers can use ballast (weights to keep the solar system in place) or a combination of ballast and drilled attachments to reduce the number of holes and the risk of leakage. Optimal energy performance can be achieved through any of these flat roof solar panel installation methods.

Can a flat roof solar system be installed on a domestic property?

Whilst flat roof solar systems are more commonly used on commercial buildings, they can certainly be fitted onto domestic properties too. Read on to find out more about flat roof solar, and how in many cases it is actually better than normal on-roof solar! How do Solar Panel Systems on a Flat Roof Work?

How much do flat roof solar panels cost?

Flat roof solar panels can cost between £2,800 - £12,100 for the average 2 to 3 bedroom house.
