How do I install a solar photovoltaic system?

The most efficient way to install a solar photovoltaic system is by using a Heliomotion. Simply because a Heliomotion has innovative sun-tracking technology that enables solar panels to track the sun throughout the day and year. The possibilities for mounting solar are endless.

How do I plan a solar panel installation?

Choose a supplier and establish if the installation will fall under Permitted Development or if full planning permission is required 3. Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5.

How do I choose a solar panel structure?

The structure must be compatible with the solar panels and other components of the system, such as inverters and mounting hardware. Ensure the structure is designed to accommodate the specific requirements of your solar panels, including their size, weight, and electrical connections.

Can I install my own solar panels?

Yes, you can install your own solar panels. Sunstore Solar can provide professional installation, but we appreciate some people like to get stuck into a project. We designed our solar panel kits specifically for DIY solar panel installation projects. And what better project than providing energy security for your family or business?

Do you need planning permission to install solar panels?

If you're off-grid, calculate how many appliances or tools you want to power and go from there. Use our solar panel calculator to generate an estimate of the size of solar kit you'll need. Check your local planning requirements - Roof mounted solar panels don't usually need planning permission.

What is an in-roof solar panel system?

An in-roof solar panel system sits on top of the roofs battens and is then tiled or slated around. It is possible to create a whole roof out of solar panels using an in-roof system.

I configured the panel in my workshop first, attaching all the elements on a small plywood panel that I sealed with oil-based paint. I used 3/4-in. washer-head screws to mount the solar charge control module, power ...
