Power measurement from on-land substation power meter showing the peak export of 592 kW. The configuration of the electrical drive train has been found to limit peak power to about 600kW. During the first on-land maintenance cycle adjustments to the drive train are planned, aiming to increase power capacity towards 850kW.

Ocean Power Technologies, Inc. develops and commercializes proprietary power platforms that generate electricity by harnessing the renewable energy of ocean waves in North America, South America, Europe, Australia, and Asia. The ...
