

PowerFilm Solar is a company that designs and manufactures solar solutions using thin-film or crystalline photovoltaics (PV) technology. It offers custom solar cells, foldable, rollable, and electronic component panels, solar development kits, portable solar chargers, and other products.

PowerFilm works with multiple photovoltaic (PV) technologies to ensure our customers get the best custom solar solution possible. The devices used throughout the IoT and portable power sectors are incredibly diverse, and no one solar technology or solution works for everything.

PowerFilm, Inc. is a manufacturer of flexible thin film solar photovoltaic (PV) modules, or solar panels, based in Ames, Iowa and is a provider of solar products for industrial, consumer and military remote power applications. PowerFilm's amorphous silicon (a-Si) thin-film solar modules are both built into solar charger products as well as sold ...

PowerFilm Solar's custom solar solutions for Auxiliary Power Units (APUs) help you improve efficiency, lower emissions, and extend the lifespan of your equipment--whether you're using ...

Depending on the application, several solar technologies can satisfy your particular needs. PowerFilm Solar has been developing and honing the manufacturing of amorphous silicon for over 35 years and also offers a host of custom crystalline solar solutions.

PowerFilm, Inc. is a manufacturer of flexible thin film solar photovoltaic (PV) modules, or solar panels, based in Ames, Iowa and is a provider of solar products for industrial, consumer and military remote power applications. PowerFilm's amorphous silicon (a-Si) thin-film solar modules are both built into solar charger products as well as sold to OEM integrators.

Depending on the application, several solar technologies can satisfy your particular needs. PowerFilm Solar has been developing and honing the manufacturing of amorphous silicon for over 35 years and also offers a ...

PowerFilm Solar's custom solar solutions for Auxiliary Power Units (APUs) help you improve efficiency, lower emissions, and extend the lifespan of your equipment--whether you're using diesel or electric APUs. With over 200+ years of combined solar expertise and more than 50,000 panels delivered, we've been a trusted industry leader since 1988.
