

Does Fiji have a nuclear power station?

Fiji neither has any fossil fuel energy resources nor any nuclear power stations. It imports all its fuel requirements for transportation and electricity. Renewable energy resources are mainly used for electric power generation. Due to geographical location of Fiji, it has good renewable energy resources such as solar, wind, biomass and hydro.

What is Fiji's national energy policy?

Fiji's National Energy Policy, 2023-2030, aims to facilitate investment in, and access to, affordable, climate-resilient, and sustainable energy services. Fiji primarily generates electricity through hydropower, however, a significant share of electricity generation comes from fossil fuels given variability of hydropower generation.

What is the energy situation in Fiji?

It is a small island developing state (SIDS) that is heavily dependent on imported fossil fuel for its energy needs. The paper attempts to determine the past and current energy situation in Fiji, challenges faced and strategies to overcome these challenges. In 2014, Fiji generated 859 GWh of grid electricity from 259.8 MW of power plants.

Does Fiji have solar power?

According to the annual reports of Energy Fiji Limited (EFL), there has been some solar electricity generated from 1998 to 2007 by solar PV system that was commissioned in November 1997 (FEA 2016). In 1998, this system generated around 12 MWh of electricity and was doing well for almost 6 years.

How does Fiji generate electricity?

Today, as much as 60% of Fiji's electricity generation is derived from hydropower while remote islands and some rural areas are largely dependent on energy production powered by imported fossil fuels. The growth of Fiji's land transport sector has been largely concentrated around growing urban centres.

Will Fiji be able to source 100 percent of its energy?

Suva, Fiji, October 21, 2020- A landmark agreement between Energy Fiji Limited (EFL) and IFC to deliver the largest solar project of its kind in the Pacific to date has been hailed a transformative step that will take the island nation closer to its goal of sourcing 100 percent of its energy needs from renewable sources.
