Do I need planning permission for a solar PV project?

The rules apply to both solar thermal panels and solar PV. However, permitted development rights do not always apply as there are a few exemptions. If your project falls into one of these, you will require planning permissionunless you can make any adjustments to your plans. Exceptions can include:

Do I need planning permission to install solar panels?

The installation of solar panels and equipment on residential buildings and land may be 'permitted development' with no need to apply to the local authority for planning permission. There are,however,important limits and conditions,detailed on the following pages,which must be met to benefit from these permitted development rights.

Do you need planning permission for solar panels on flats & apartments?

Gaining planning permission for solar panels on flats and apartments is possible, and whether you'll require permission is based on the same factors as for houses. However, planning permission for flats and apartments comes with a bit more administrative red tape.

Do rooftop solar installations need planning permission?

Rooftop solar installations always need building regulations approval, but rarely require planning permission. This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission.

Do solar panels come under 'permitted development'?

The key piece of legistaltion is The Town and Country Planning (General Permitted Development) (Amendment) (England) Order 2012. Our understanding of the legislation is that installing a solar PV panel system will now in most casescome under 'Permitted Development' if the installation is as below:

Can solar panels be installed on a shed or garden office?

When installing solar panels on a shed or garden office all the same rules apply as if you were installing on your home. The panels should face as much south as possible, all aspects of the installation of a grid system must be completed by suitably experienced competent persons and it is best to avoid any risk of shading on the panels.
