

At Stinson, we navigate a complex mix of renewable energy markets, resources and regulations nationwide and beyond. Our skilled energy attorneys know every segment of the industry--wind, solar, biomass, biofuels and hydro. We understand emerging energy markets and how the assets underlying those markets are developed and operated.

The current EU policy dictates that Latvia must increase the share of renewable energy in its final energy consumption and Latvia has plans to reach 50 percent by 2030 according to the EU's National Energy and Climate Action Plan 2030. Much of Latvia's heat and electricity still comes from imported natural gas.

Electricity will be the cornerstone of Latvia's energy transition. Latvia's hydro-dominated electricity system provides a favourable starting point to use clean electricity to decarbonise other economic sectors and meet the target of 57% ...

To further electrification within the energy sector, which is crucial for Latvia's broader climate goals, policymakers must foster a conducive environment for investors to support new ...

The US renewable energy industry has the wind at its back. Significantly expanded climate and clean energy incentives within recently passed legislation have breathed tremendous life into green projects. Societal pressure on businesses to reduce emissions continues to accelerate every year, adding to the industry's progress.

2025 Best Law Firms for Clean Tech/Renewable Energy Law # 1 % of Votes 33.97. 2024 Rank 1 . Orrick. Orrick is a global firm of more than 1,100 attorneys that is fiercely committed to teamwork and innovation. At Stinson, we navigate a complex mix of renewable energy markets, resources and regulations nationwide and beyond. Our skilled energy attorneys know every segment of the industry--wind, solar, biomass, biofuels and hydro. We ...

The credit market is a critical source for financing renewable energies. However, Del Gaudio et al. (2022) show that green lending reduces banks' profitability, increases default risk, and lowers credit risk. While their result is surprising since reduced profitability should increase credit risk, we argue that the existence of enormous commercial potential for ...

Fig. 1 depicts the evolution of firm innovation in renewable energy technologies since this century. It can be observed that the number of patents granted has sharply increased from 97 to 274,554 throughout the period,

and the number of patent applications also witnessed a vigorous and constant growth from 454 in 2000 to 237,238 in 2021 and ...
