How many variants of 2020 GWM Fengjun 5 (Wingle 5) pickup are there?

Chinapev.com » All Brands » 2020 GWM FengJun 5 (Wingle 5) Pickup Technical Specs There are 8 variants of 2020 Fengjun 5 pickup, including a total displacement of 2.4L and a total of 1 transmission options.

Do I need a water wheel for a 2 crank generator?

You need 1 water wheel per 2 crank generators, yes. It is somewhat confusing cause with just 1 water wheel a line of many generators will all show visual turning even if only 2 of them are actually making power. You can check Each water wheel produces 100NM of force (as of .1) each T1 Crank Generator uses 40 NM, giving you 2.5 per wheel.

Will a water wheel work for a large number of generators?

Presumably it would work for any arbitrarily large number. Yeah, they will show that they are spinning visually but won't make power if you don't have enough water wheels. You need 1 wheel for every 2 generators. However the wheels can be added to either end which is nice.

Should I use water wheels if I have a 150 kW generator?

Note the 110% power increase research isn't included in the tooltip so even with that it will still read 150kW even though it will produce more. That's sad. That ratio is so bad, it's not even worth to use water wheels, cranks up a lot of space for nothing when you still have to use other generators manually.

How do you put generators across the river?

My friend and I put generators across the river at point Victor and one row is 18 wheels chained to 36 generators. Edit: Further tidbit. Put floor panels 4 levels from the main floor to give yourself that floor space back. 3 will put you just above the wheels and generators, but machines will be unable to be placed. Brooooo....
