

By advancing battery storage and solar panel manufacturing, Romania is positioning itself as a key player in the energy transition landscape. These milestones not only contribute to the country's decarbonization goals but also set the stage for a more sustainable and efficient energy sector.

The Ministry also announced a EUR199 million call to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, also funded through the NRRP, with EUR149.25 million for new battery production, assembly ...

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's ...

5 ???· Just over a year later, Stellantis and CATL have finalized their proposed joint venture and will pool funds to build a new LFP battery plant in Spain that could reach an annual capacity of 50...

The Ministry also announced a EUR199 million call to support Romania's battery and solar photovoltaic (PV) manufacturing sectors, also funded through the NRRP, with EUR149.25 million for new battery production, assembly and recycling facilities.

In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's northwest has flipped the switch.

In 2023, the equivalent of 1.7 million more European homes became solar battery-powered, according to the latest analysis from SolarPower Europe. 17.2 GWh of new BESS capacity was installed in Europe in 2023, experiencing an impressive 94% increase compared to 2022.

The country's solar sector is set to grow substantially, which will help the battery storage market kick on. Image: Econergy. The European Commission has approved a EUR103 million (US\$125 million) package of direct grants from the government in Romania for battery storage projects.
