

Where can SAFT Batteries be found?

Saft's batteries and battery systems can be found in all four corners of the world- and even in space. From the Arctic Circle to the Sahara Desert, or within NASA and European Space Agency vessels, we provide state-of-the-art batteries and battery systems. Our offering also includes end-to-end expert service for these extremely diverse markets.

Are SAFT Batteries safe?

For over 100 years, Saft's longer-lasting batteries and systems have provided critical safety applications, back-up power and propulsion for our customers. As a leading battery company, Saft's innovative, safe, and reliable technology delivers high performance on land, at sea, in the air, and in space.

How many battery designs does Saft produce?

At Saft, we produce over 400 different battery designs to suit virtually every requirement, each optimized for energy and power, guaranteeing integration with the electrical architecture of all fixed-wing and helicopter aircraft - even drones.

What are SAFT Batteries used for?

Whether it be for aerospace or transportation, telecom & networks or oil & gas, health or energy utilities, Saft batteries are used for numerous applications and on all continents. From the Arctic Circle to the Sahara Desert, or within NASA and European Space Agency vessels, we provide state-of-the-art batteries and battery systems.

What happened to Alcatel & Saft?

In 1995, Alcatel delisted the company from the stock market and acquired a 100 percent of its shares. Later, Saft purchased Nife and Alcad, its main rivals, as well as the Czech company Ferak. In 2001 it suffered a setback and sold facilities in South Korea and Mexico.

Are propulsion batteries suitable for aviation?

However, propulsion batteries for aviation come with a range of obstacles, including cell selection, total energy storage requirements, space availability and the need to comply with standards and certification.

Saft SBLE, SBM and SBH ranges of block batteries are the optimum solution where power is required for an uninterruptible power supply, switching and transmission, emergency and ...

Reliable Saft Ni-Cd battery solutions for power plants backup. Saft nickel battery solutions provide backup power to power plants to ensure the continuous, uninterrupted operation of generator units, emergency lighting, critical safety and control systems for up to 100 hours. Our high-performance Ni-Cd battery technology is designed for easy installation and minimal ...

We provide turnkey solutions up to hundreds of MW's that integrate a Saft lithium-ion battery system with power-conversion devices as well as power control and energy-management functions. Saft's lithium-ion energy storage systems batteries are used for: Large renewable integration (PV and wind farm) installations

LO, G. The Saft LO/G cylindrical primary lithium cells are based on Lithium-Sulphur dioxide (Li-SO₂) chemistry and feature very high surface area spiral electrodes with high power and maximum current pulse capability. They are ...

Saft, un fabricant de batteries médaillé de platine EcoVadis. Nos performances en matière de développement durable sont évaluées chaque année par EcoVadis, qui a procédé à l'étude de plus de 100 000 entreprises.. EcoVadis se concentre sur 21 enjeux regroupés en quatre thèmes : Environnement, Droit du travail et Droits de l'Homme, Achats durables et Éthique.

Saft solar nickel battery system delivers reliability and cost-efficiency for Pertamina offshore gas platform Customer case study Download (English) Sunica plus Ni-Cd storage batteries for solar energy rural electrification in Madagascar Customer case study Download (English) Inquire Now.

Saft's nickel battery product ranges deliver highly reliable and efficient energy storage in off-grid schemes, from the point of production through transmission and distribution to consumption, and is ideal for Sub Saharan African and emerging economies across Asia, where much of this demand will come from.. Storing renewable energy with Saft's off-grid Ni-Cd battery solutions

Powerful lithium-ion batteries for immediate backup . Saft cutting-edge li-ion battery solutions deliver an immediate independent power source in the event of an outage to ensure the continuity of the UPS protecting high-value, mission-critical data. Our range of advanced and powerful lithium-ion batteries can instantly crank up an emergency generator engine, offer high ...

Saft's on-board solutions provide reliable power, reduced weight and volume of on-board components, low maintenance and improved battery efficiency to help train manufacturers and operators work more efficiently. ... A single MSX battery can perform both backup and engine starting functions so that two onboard systems can be replace by just ...

Grâce aux batteries au nickel de Saft, le phare de Göteborg est autonome toute l'année. 03/06/2019. Les batteries Saft brisent la glace en Russie depuis plus de 30 ans. 22/06/2018. L'Ouessant fait de la résistance. 06/03/2018. Pouvez-vous vraiment vous permettre d'ignorer la propulsion électrique ?

Battery services from battery experts. From full operation and maintenance to basic service support, Saft is a long-term partner that operates a customer-centric service approach and that has a 100-year legacy in

industrial batteries.. Our global team of highly skilled and experienced professionals delivers multi-level service solutions through our 4S program - Saft Services for ...

The Saft Xcelion 6T[®] is a 24V rechargeable Li-ion battery system designed as a drop-in replacement for traditional lead-acid 6T batteries in military ground vehicles. It provides the power equivalent to two lead-acid batteries at 25% of the weight and 50% of the volume. The Xcelion 6T[®] leverages Saft's unique Super-Phosphate[®] lithium iron ...

Saft recherche pour son site de Poitiers situ  en Nouvelle-Aquitaine, un(e) Ing nieur(e) Automatismes pour prendre en charge le suivi et la r alisation des demandes d' volutions formul es par les unit s de production qui impliquent des modifications vari es dans le domaine de l'automatisme sur des lignes de fabrications de piles et batteries.

The right Ni-Cd and Lithium battery choice for the oil & gas industry. For decades, Saft's global network has been supplying long-life primary lithium batteries, rechargeable lithium and nickel batteries that can operate in extreme ...

Saft's takes overall responsibility for the design, manufacture and supply of the entire battery power system, simplifying battery integration. The system is supplied complete, factory-tested and ready to fit - including rafts, trays, access mechanisms, water filling systems, isolators, fuses, connectors and battery management control (BMC ...

Features & Benefits. Constructed in robust and reliable Saft Nife[®] pocket plate, our block nickel batteries function in a wide range of temperatures, resist electrical abuse, shock and vibrations and need only basic maintenance. This ensures a low total cost of ownership (TCO) over a life cycle that can last 20 years or more.
