How much does solar cost in California?

The average price per watt of solar power in California is \$2.31/W. These prices are before incentives. After the federal solar tax credit, the final cost will drop by 30%, down to \$14,240 for a 8.8 kW system. Many states even offer local rebates and incentives that lower the price further--sometimes by thousands of dollars.

Who is Solar4America technology?

Solar4America Technology, Inc. is a leading module manufacturer committed to providing optimal solar solutions for projects big and small. In just over one year, our Sacramento factory, the first to implement M10 technology, has become the second-largest domestic producer of solar modules in the United States.

Are solar panels sold separately?

*Solar panels are not sold separately. Grid tie inverters convert solar DC power to home-friendly AC power and provide net metering capability. Batteries optimize cost savings by storing surplus energy when rates are lowest and utilizing it during peak demand times. They also serve as a reliable backup power source during outages.

Are our solar modules UL certified?

Our solar modules are certified by UL, CSA and ETL, and are on California CEC List. We have been approved by multiple institutions including Dividend, MOSAIC, Sunlight Financial, Improvement Funding and Renew Financial. Get the latest on our innovative manufacturing and modules!
