A significant focus of the Energynautics report is the integration of renewable energy sources into St.
Maarten's power grid. The consultancy identified solar PV installations as the most practical and viable option
for the island's transition to cleaner energy.

St. Maarten faces significant challenges in transitioning to 100% renewable electricity due to its limited space, lower wind speeds, and frequent hurricanes. The island's small and hilly terrain makes large-scale solar and wind energy installations difficult, as many potential locations are already used for tourism and housing.
