

Where can I find a list of solar power plants in Slovenia?

Since 2007, the Slovenian Photovoltaic (PV) Portal has been providing information on solar energy in the Slovenian language. It is the only place where you can find a list of all solar power plants in Slovenia in one place, find basic information on the individual building blocks of solar power plants and find out about new developments.

Will Slovenia switch from solar panels to solar plus storage?

Subsidies in the residential sector will shift from solar panels alone to solar plus storage, it said, without providing additional details. Slovenia plans to start its first green hydrogen projects in 2023, under the European Union's Just Transition Fund, according to the SPA.

How long will the net metering scheme last in Slovenia?

"Slovenia has extended the period of the net-metering scheme system for the residential sector (for PV installations up to 11 kW) until the end of 2023 and that will result in high demand, especially with announced accompanying subsidies," a SPA spokesperson told pv magazine.
