

What is the solar energy potential of Armenia?

Solar Energy SOLAR ENERGY Armenia has a significant solar energy potential. The average annual amount of solar energy flow per square meter of horizontal surface is about 1720 kWh

Where is Solaron available in Armenia?

Solaron's services are available throughout all regions of Armenia. Solaron is the first manufacturer of solar panels in Armenia, which annual production capacity reaches about 60 megawatts. Brand "Solaron" is a registered trademark for products manufactured by Profpanel.

How many projects has Solaron completed in Armenia?

Over the course of 8 years, Solaron has successfully launched and completed more than 1400 projects both in Armenia and abroad. Innovation is at the core of Solaron's approach, and we actively integrate innovative technologies and solutions into projects. Solaron's services are available throughout all regions of Armenia.

Who makes Solaron solar panels?

Solaron started its solar panel production activities on June 29, 2016, becoming the first Armenian manufacturer of solar panels. The brand "Solaron" is a registered trademark for products manufactured by Profpanel. Our annual production capacity of solar panels is 60 MW.

Currently, the use of solar systems in Armenia is not only for the purpose of energy saving but also has become cost-effective. Moreover, the efficiency of solar panels and particularly the payback period of solar panels prove the benefits of switching to solar energy and making that sound decision.

1. Advantages of solar energy for households in Armenia. Solar energy in Armenia has started to develop very quickly in the last 15 years. The Republic of Armenia may not seem like a rich country in terms of energy resources, but it is one of the richest in the region in terms of sun, sunny days throughout the year, and solar energy.
