

Harnessing the power of the sun, Lodestone's solar farms are increasing the supply of renewable energy to local networks and the national grid. In our Phase 1 programme we are developing five solar farms in Kaitaia, Edgecumbe, ...

The solar farm would consist of solar photovoltaic (PV) panels similar to those installed on homes and businesses across New Zealand and Australia. Panels will be mounted on steel frames supported by driven piles that will create minimal disturbance to the land.

We develop and build high quality, utility-scale solar PV farms for the New Zealand power grid, connected to national distribution networks. We have experience in the planning, design and construction of utility-scale solar and infrastructure projects in New Zealand and internationally.

Our mission is to accelerate the uptake of renewable energy in New Zealand by creating utility-scale solar assets across the country. We currently have consents to construct five solar farm sites with six other sites currently being assessed by relevant authorities.

Kiwi Solar develops, constructs, owns and maintains utility scale solar farms in New Zealand. Utility-scale solar farms represent a great opportunity for New Zealand. They produce clean, reliable energy, offset CO2 emissions and will become an integral part of the power grid.

Genesis Energy, New Zealand's largest energy supplier, has set sights on the Northern Waikato region and announced a 300MW solar farm plan. The chairperson reported that not only is the project cost-effective but also giving tough competition to ...

Harnessing the power of the sun, Lodestone's solar farms are increasing the supply of renewable energy to local networks and the national grid. In our Phase 1 programme we are developing five solar farms in Kaitaia, Edgecumbe, Waiotahe, Whitianga and Dargaville.

On April 2024 begun the construction of the largest solar farm in New Zealand after reaching financial close in December 2023 This 63 MW solar farm is located one hour's drive from Christchurch, at Lauriston on the Canterbury Plains.

Kiwi Solar develops, constructs, owns and maintains utility scale solar farms in New Zealand. Utility-scale

solar farms represent a great opportunity for New Zealand. They produce clean, reliable energy, offset CO2 emissions and will ...

"Once completed, Lauriston solar farm will be the largest solar farm in New Zealand. This project demonstrates our pioneering spirit in leading sustainable energy transitions in new markets," said Frigerio.
