

How many solar power plants are in Czechia?

A total of 82,799 solar power plants were connected to the grid in Czechia last year. Image: CEZ Group  
Czechia recorded a significant increase in installed solar capacity last year, with about 970 MWp of capacity added to the grid. However, the growth was mainly driven by household rooftop solar, according to the Czech Solar Association.

How much solar power does the Czech Republic have in 2022?

As the central European nation clocked in 2,627 MW of installed solar PV capacity at the end of 2022 - which is 426 MW up from the previous year, according to estimates published by the International Renewable Energy Agency (IRENA) - the Czech Republic's continued achievement of these solar gains was on the lips of most attendees.

Why is the solar market growing in Czechia?

The figures mark a period of rapid growth in Czechia's solar market. The growth has been largely driven by residential PV, with most of the new installations (80,069) being domestic PV plants, supported by the country investing an additional CZK 55 billion (\$2.5 billion) in its New Green Savings program back in March 2023.

Will Czechia reach its solar potential?

As Czechia reaches its solar potential, with impending changes to the country's legislative landscape ushering in greater utility-scale solar array rollouts, over 5,000 attendees - government ministers, industry experts, and key business stakeholders - descended on Prague this week for the 2023 Smart Energy Forum.

Will solar power ever eclipse nuclear power in Czechia?

Robert Sedmera, a sales representative for Austrian PV manufacturer Fronius, told pv magazine that the company has operated in Czechia since 1991. He said he does not believe the country's solar capabilities would ever eclipse nuclear, but noted that the public appetite is leaning more towards solar and cheaper electricity prices.

Who are the sales representatives of solar solar SRO?
