

Since Solar is an intermittent power generation, functioning on the average 17% -22%, this renewable electricity has to be backed by base load, mostly "dirty" energy that has to be ...

In the context of escalating concerns about environmental sustainability in smart cities, solar power and other renewable energy sources have emerged as pivotal players in the global effort to curtail greenhouse gas ...

In 2015, Ye et al. fed historical power generation, solar radiation intensity, and temperature data into a GA algorithm-optimized fuzzy radial basis function network (RBF) ...

For the generation of electricity in far flung area at reasonable price, sizing of the power supply system plays an important role. Photovoltaic systems and some other renewable ...

The selection of the in-situ step-up transformer is also explained: self-cooling, low-loss power transformers are preferred; the transformer capacity can be selected in accordance with the ...

influence criteria of solar photovoltaic power plant of optimal site selection of coefficient of concordance of MCDA of analytical hierarchy process (AHP) 1. Introduction Siting is a crucial ...

Solar energy is the radiation energy released by transforming hydrogen gas into helium, which takes place in the sun's core. In solar power generation, the radiation from the sun is usually ...

This paper proposes a model called X-LSTM-EO, which integrates explainable artificial intelligence (XAI), long short-term memory (LSTM), and equilibrium optimizer (EO) to reliably forecast solar power ...

The wind-solar hybrid power generation project combined with electric vehicle charging stations can effectively reduce the impact on the power system caused by the random charging of electric cars, contribute to the in ...

Solar power generation is the most common way to use solar energy because of its ease of maintenance and ... support the site selection of solar power plants in California. 2. The CBA ...

Suitable site selection for solar PV power plants directly affects both the installation and operation process and the electricity generation costs (Yolcan and K&#246;se 2020). ...
