

Why do businesses use solar energy in Fiji?

With on-site solar energy generation in Fiji, businesses can generate their own electricity and become less vulnerable to power outages, grid disruptions, and energy supply constraints. Many organisations in Fiji switch to solar energy as part of their commitment to sustainability and reducing their carbon footprint.

How can Fiji meet its energy needs?

In line with this plan, assessments have shown that a combination of solar, wind, geothermal, marine, biomass, and biofuel could be used to meet Fiji's energy needs. Currently, as much as 40 percent of Fiji's power is generated from diesel and heavy fuel oil, which is purchased via local companies from Singapore-based suppliers.

Who supports the Fiji solar project?

IFC has been supported by the governments of Australia and New Zealand through the Fiji Partnership and the Danish Government to carry out this solar project in Fiji.

How does Fiji generate electricity?

Close to 60 percent of Fiji's electricity generation is derived from hydropower, while remote areas and outer islands are dependent on imported fossil fuels and biomass. Fiji's 20-year National Development Plan calls for all power to be generated from renewable sources by 2030.

What incentives are offered in Fiji?

Incentives are offered to encourage investments in energy generation through renewable energy sources and to reduce reliance on fossil fuels. Fiji has untapped renewable energy resources such as hydro, wind, biomass, solar, and geothermal, which can be used for energy generation.

What are the challenges faced by Fiji's energy sector?

The challenges faced by Fiji's energy sector are largely due to its geographical environment and small market size. Close to 60 percent of Fiji's electricity generation is derived from hydropower, while remote areas and outer islands are dependent on imported fossil fuels and biomass.

The 1.55 MW solar PV project is the first of two phases required to achieve the target of 100% electricity generation from renewables in Taveuni. The current phase 1 will reach 65% and will be completed by 2020. GGGI will continue to support the Government of Fiji beyond this project to achieve the 100% target by 2030.

By harnessing the abundant solar resources of the region, this project aligns with Fiji's national target of achieving 100% renewable electricity and its international commitments to reduce greenhouse gas emissions by 30% by 2030, thus improving living standards, health outcomes, job creation, climate resilience and food security.

Providing solar power to homes, communities and businesses across the whole of Fiji, regardless of their remote, rural or urban location. For Fiji to be powered by 100% renewable energy. Long Term Aims & Vision: To grow the business and empower more communities with solar power.

Suva, Fiji, October 21, 2020- A landmark agreement between Energy Fiji Limited (EFL) and IFC to deliver the largest solar project of its kind in the Pacific to date has been hailed a transformative step that will take the island nation closer to its goal of sourcing 100 percent of its energy needs from renewable sources.

Solar power provides businesses with greater energy independence and resilience by reducing their reliance on external energy sources, such as the grid. With on-site solar energy generation in Fiji, businesses can generate their own ...
