

Do Solax batteries have a battery management system?

The SolaX batteries also have advanced battery management systems that protect them from overcharging or discharging, ensuring long life. Additional batteries are allowed to add as the energy storage needs grow over time, because the SolaX Power energy storage system is modular and expandable. What do battery do?

Where are Solax batteries made?

The current 'triple power' series is aimed at the residential market. Their batteries are designed and manufactured using in-house IP and facilities. The Australian office address listed on SolaX's website is 21 Nicholas Dr in Dandenong South which is the address of Raystech (solar product distributor).

Does a Solax battery need a hybrid inverter?

The battery is a DC-connected solution, meaning it would need to be paired with a SolaX hybrid inverter to be operational. The T-BAT-SYS-HV-S3.6 series is SolaX's new option. The battery features the same chemistry as the T-BAT-SYS-HV-5.8 series however a smaller design of 3.6 kWh nominal capacity.

What is the depth of discharge (DOD) of Solax triple power batteries?

The Depth of Discharge (DoD) of the Solax Triple Power batteries is 90%. This puts it on par with some of SolaX's competitors, namely Sonnen (90% DoD) and Alpha ESS (90% DoD). DoD is an important factor to account for when making a buying decision for a solar battery.

Does Solax offer a warranty on Triple Power Batteries?

Compare quotes from up to 7 installers in your area now. SolaX provide a standard warranty of 10 years for the Triple Power batteries. There is however no performance warranty mentioned in the warranty document which typically outlines a minimum output after 10 years.
