

On the remote island of Malekula, the second-largest island in Vanuatu, a new solar micro-grid is changing the lives of over 2,800 people -- boosting local development while contributing to Vanuatu's sector specific target of transitioning to close to 100 percent renewable energy for electricity by 2030.

Solis Energy's Solar Power Plants (SPP) deliver reliable solar-generated electricity - anytime and anywhere. Perfect for remote installations where trenching is too costly or impractical. Our SPPs are ideal for remote wireless networking and communications, security applications such as perimeter surveillance and access control, smart grid ...

We offer a comprehensive range of solar energy solutions designed to meet various needs and preferences. Our services include the installation of solar panels, electric vehicle (EV) chargers, solar batteries for energy storage, electric water heating systems, and heat pumps.

A significantly more powerful solution, the 5kW Hybrid package provides a household of 3 to 4 bedrooms with exceptional energy savings as well as a very decent backup in case of power failure. Can support up to: 2 One-Ton Inverter Air Conditioners; Water Pump/Motor; Refrigerator; LED Television Set(s) Lights and Fans; Backup Time: Up to 180 minutes

Solis is one of the world's largest and most experienced manufacturers of solar inverters supplying products globally for multinational utility companies, commercial & industrial rooftop projects, and residential solar systems.

Founded on the principles of sustainability and innovation, we've grown from a passionate idea into a leading provider of renewable energy solutions. Our expertise spans solar power systems, energy-efficient heating, and electric vehicle charging solutions, all designed to empower modern living with cleaner, more sustainable energy choices.
