"It will install additional solar capacity in the country and deliver the largest grid-connected battery storage system in the Pacific, which is a crucial first step in expanding grid-connected renewable energy through private sector investment."

Discover the groundbreaking project accelerating the renewable energy transition in Solomon Islands. Learn how this initiative will boost renewable energy generation and reduce reliance on costly fossil fuels.

The project will construct solar farms in Guadalcanal and Malaita provinces with a total capacity of 2.5 megawatts. It will also install the country's first utility-scale grid-connected battery energy storage system to integrate more renewable energy into the grid.

The Asian Development Bank (ADB) has approved financing to support the conversion of electricity networks in five provinces of the Solomon Islands almost entirely to solar power; with the assistance of battery storage.
