

Why is solar funding important in Somalia?

This form of funding, which allows small, regular, phased out payments, has been particularly critical in Somalia as it allows micro, small and medium size businesses to overcome the hurdle of high upfront costs associated with acquiring quality solar systems to address energy challenges.

What is the World Bank doing about solar power in Somalia?

The World Bank's Somalia Electricity Access Project has deployed \$3.0 million towards electrification of households and businesses through standalone solar home systems, and the Bank is using an additional \$1.0 million to facilitate analytical work for enabling electrification through solar-powered hybrid mini-grids.

Which countries are investing in Somalia?

Germany and the United States are the main investors in Somalia. The country launched a new investment promotion strategy in 2020 that outlined 10 priority areas for foreign investment, including livestock, fisheries, energy and manufacturing.

Does Somalia have access to electricity?

"Access to energy is a precondition to development, supporting livelihoods and powering essential services such as education and healthcare," said UNDP Resident Representative in Somalia Jocelyn Mason. "However, 65% of people don't have access to electricity in Somalia."

What is AMP Somalia?

The AMP Somalia project is tailored to the unique nature of the energy sector in Somalia, and as such aims to work with this existing ecosystem of ESPs to enable the hybridization of existing diesel minigrids and to make solar minigrids more competitive and affordable.

What is the Somali business Catalytic Fund (SBCF)?

The change of fortunes has been made possible through the Somali Business Catalytic Fund (SBCF), a \$13 million matching grant operation under the World Bank-supported Somali Core Economic Institutions and Opportunities Project (SCORE).

As such, a 76 KVA Hybrid solar systems with a capacity of 35% fuel saving or 120 liters of diesel daily was installed in the Office of Prime Minister in Villa Somalia. This installation sufficiently demonstrated how solar energy can be used to power public offices with cheap, sustainable and clean energy.
