

What is Energy Vault?

In addition to its unique GESS offering, Energy Vault is one of a crowded field of competitors providing storage orchestration software to grid operators and designing and coordinating the construction of grid-scale battery and fuel-cell storage facilities. For an in-depth look at the company, please read my previous overview article.

Does Energy Vault have a battery energy storage system?

The last bit of recent Energy Vault news is that it has successfully installed a large (69MW /275MWh) battery energy storage system at the Stanton Energy Reliability Center in southern California. The battery installation is now being operated at full capacity by Energy Vault's partner in this project, Wellhead.

What is Energy Vault's Calistoga project?

Energy Vault views the Calistoga project as a model for the company's future utility-scale hybrid storage system deployments, especially in the California market. The facility will be ready for use in June of this year.

How does Energy Vault make money?

In addition to the technology licensing revenue, Energy Vault will receive a project revenue royalty over the complete operating life of each project, including software and maintenance revenues.

Does Energy Vault have a GESS system?

In January, Energy Vault announced it had signed an exclusive 10-year agreement with a South African consortium called GESSOL for access to Energy Vault's GESS technology and VaultOS orchestration software (used in GESS, battery, fuel cell, or hybrid installations) throughout the 16 member-state Southern African Development Community.

Does Energy Vault have a mini-grid facility in Calistoga?

Bravo, Energy Vault! Here in the States, Energy Vault announced it has won a bid to install a battery and fuel-cell-powered mini-grid facility in the northern California town of Calistoga. This facility increases the town's resiliency during fire season and saves electrical customers money.

project revenue royalty streams to Energy Vault as systems are built and commissioned. We also recently announced that for the first time we are bringing Energy Vault's gravity energy storage technology to Africa. In the fourth quarter of 2023, we signed a 10-year licensing and royalty agreement with GESSOL, a consortium operating in
