

Why is solar energy important in South Sudan?

As characterised by ample sunshine with strong solar power potential, South Sudan remains as one of key destinations on African continent for solar energy investment. In addition to this, it has been documented that evolution of solar PV is of great significance in South Sudan.

Will South Sudan build a 12 MWp solar plant in Juba?

Kampala-based developer Aptech Africa says it plans to build a 12 MWp solar plant in Juba. The capital of South Sudan is set to host a new 12 MWp grid-connected solar plant.

How long does solar energy last in South Sudan?

Proponents of solar energy argue that a solar system can produce reliable electricity for about 25 years. Having recognised solar energy potential, South Sudan is expected to put more emphasis on development of solar energy sector as part of its fight against energy poverty and economic diversification.

Will South Sudan host a new grid-connected solar plant?

The capital of South Sudan is set to host a new 12 MWp grid-connected solar plant. The nation had just 1 MW of grid solar at the end of 2021, according to the International Renewable Energy Agency (IRENA), but that figure could be set to leap thanks to a project under development in Juba by Ugandan company Aptech Africa.

How solar energy can transform South Sudan's economy?

A solar energy can also be transformative to South Sudan's economy. For example, solar energy is affordable, cleaner and last longer as compared to energy from diesel-powered generators because generators need diesel to burn and they also need to be replaced after few years.

Who financed the Juba solar project?

The Juba project will be financed by Ezra Construction, which is part of the South Sudanese Ezra Group, an Aptech Africa representative told pv magazine. IRENA's latest figures show that South Sudan's 1 MW of grid solar has been in place since the end of 2018.

Clean, accessible water in South Sudan means more than just hydration - it's a safeguard against disease, a key to food security, and a foundation for development. Over 41,000 people are now benefiting from these solar-powered water systems, which serve both human consumption and agricultural needs.

The Global Solar and Water Initiative team undertook a visit to South Sudan in order to assess selected existing solar pumping schemes, evaluate the feasibility to solarize water supply points in selected camps and raise awareness and solar technical expertise among WASH stakeholders in ...

Clean, accessible water in South Sudan means more than just hydration - it's a safeguard against disease, a key

to food security, and a foundation for development. Before solar-powered systems were introduced, many communities were forced to rely on contaminated water sources, leading to outbreaks of cholera and other waterborne diseases.

Explore the recent commissioning of a 50.144 kWp solar installation with a 218 kWh battery system in Juba, South Sudan. This resilient hybrid power solution, benefiting over 50 employees, enhances energy reliability, reduces emissions, and marks a significant stride towards a sustainable and efficient renewable energy future for the city.

The Juba Solar Power Station is a proposed 20 MW (27,000 hp) solar power plant in South Sudan. The solar farm is under development by a consortium comprising Elsewedy Electric Company of Egypt, Asunim Solar from the United Arab Emirates (UAE) and I-kWh Company, an energy consultancy firm also based in

Aptech, which installed a solar rooftop-diesel system for the Upper Nile University of Malakal in South Sudan in November, has secured government approval to buy the electricity from the...

As characterised by ample sunshine with strong solar power potential, South Sudan remains as one of key destinations on African continent for solar energy investment. In addition to this, it has been documented that evolution of solar PV is ...

"Variable Renewable Electricity (VRE) plus-storage projects are in the planning phase in South Sudan including a 20 MW solar park coupled with a 35 MWh storage system. 78 "In 2021, South Sudan installed a solar rooftop-diesel system for the Upper Nile University of ...

Sungate Solar offers reliable and sustainable solar solutions in South Sudan. Our innovative products and services provide access to clean energy, powering homes, businesses, and communities. Embrace the future with Sungate Solar's affordable and efficient solar solutions for a brighter tomorrow in South Sudan.
