

How much do solar panels cost in Spain?

This will be determined by several factors, not least if you go for an on-grid or off-grid installation. You should expect the lowest priced off-grid installation to cost around 5,000 euros for solar panels in Spain. This kind of system would be suitable for a small home with between two and three bedrooms.

How much does a solar system cost?

The price will vary depending on the size, brand and type of solar panels, and whether the need is on-grid or off-grid. On average, a Grid-connected household needs a 3kW solar system producing about 12KWH of electricity per day will cost around 4500/5,500EU.

Should you install solar panels in Spain?

This is especially true given that the cost-of-living crisis means that energy bills are higher than ever in Spain, so having your own cost-effective energy source attached to your home might be an added incentive to take the plunge and research solar panels in Spain. How much will they cost? What are the pros and cons of installing them?

Are there energy subsidies for solar panels in Spain?

Sadly, there is no longer energy subsidies for installing solar panels in Spain: these were phased out a decade ago. In fact, in 2012 there was a 7% tax added to both conventional and renewable electricity sales in Spain with subsidies and other incentives becoming a thing of the past.

Are solar panels a cheaper alternative source for Spanish homes?

The advances produced in the development of renewable energies have provoked significant decreases in the cost of solar panels, turning solar energy into a cheaper alternative source for Spanish homes. Therefore, talking about prices implies taking into account materials, labour and legal procedures.

How long does a solar system last in Spain?

Depending on individual factors the payback of a solar system in Spain is typically from 7 to 12 years. Recent changes in legislation (RD25/2019) has made the installation of Solar energy much simpler with easy registration on the Solar Register.

What is solar price per watt? A fully installed solar system typically costs \$3 to \$5 per watt before incentives like the 30% tax credit are applied. Using this measurement, 5,000 Watt solar system (5 kW) would have a gross cost between \$15,00 and \$25,000.

You should expect the lowest priced off-grid installation to cost around 5,000 euros for solar panels in Spain. This kind of system would be suitable for a small home with between two and three bedrooms.
