What is Solar Resource Atlas of Sri Lanka?

The Solar Resource Atlas of Sri Lanka is an important addition to the existing knowledge on solar resources of Sri Lanka. The first solar atlas of Sri Lanka was prepared by the National Renewable Energy Laboratory (NREL) of USA, in 2005, as the Wind and Solar Resource Atlas of Sri Lanka and Maldives.

How much solar radiation does Sri Lanka receive?

Sri Lanka receives significant amount of solar radiation across all geographical regions. The Global Horizontal Irradiance (GHI) varies between 1,247 kWh/m² to 2,106 kWh/m². It is interesting to note that the intensity of solar irradiation in lowland areas is high compared to mountainous regions.

What is Sri Lanka's first solar PV powered agrivoltaic pilot project?

The Asian Development Bank (ADB) together with the Ministry of Power and Energy (MOPE), and Ministry of Plantation Industries (MOPI) inaugurated Sri Lanka's first-ever semitransparent solar PV powered Agrivoltaic pilot project. This marks a significant milestone in the country's clean energy and agricultural landscape.

Should Sri Lanka use water bodies for solar power generation?

With limited land availability for traditional solar installations, utilizing water bodies for solar power generation presents a smart and innovative solution. This strategy supports Sri Lanka's ambitious national goal of generating 70% of its electricity from renewable sources by 2030.

How to get solar PV roof top installation in Sri Lanka?

Solar PV service providers (applicant company), having capacity to deliver the complete package of services including survey, design, supply of equipment/materials, installation & commissioning and post installation back up support must register at the Sri Lanka Sustainable Energy Authority to engage in Solar PV Roof Top installation in Sri Lanka.

Solar Industries Association was formed in 1995 by pioneering industrialists as an emerging industry collective to promote solar energy in Sri Lanka. The association has since been in the forefront representing and advocating, working with stakeholders in creating a continuously improved environment for our industrialists.

By 2030, Sri Lanka aims to generate 70% of its electricity from renewable sources, and Project Apollo's 110MW capacity will play a crucial role in meeting this goal. The project highlights the collaboration between
