

The Central African Republic (CAR) has continued a path of failed establishments of democracy entangled in conflict. While the S&#233;l&#233;ka group aspired to resolve this problem ... The technical storage or access is strictly necessary for the legitimate purpose of enabling the use of a specific service explicitly requested by the subscriber or ...

Octopus Group's first standalone battery energy storage system (BESS) project in Australia has won local approval in Queensland. Renewable energy and energy storage developer Octopus Australia said this week (9 July) that its 500MW/1,000MWh Blackstone Battery project has received planning approval from Ipswich City Council, local government ...

In 2024, the Brazilian government said that they would include batteries in their power reserve auction ("Leil&#227;o de reserva de capacidade"), allowing batteries to be paid a fee for providing extra capacity during peak hours. Given the lack of regulation for stand-alone assets and the cost competitiveness of brownfield assets, storage bids will be attached to existing solar ...

The Central African Republic is a presidential republic. Faustin-Archange Touadera was elected president for a second five-year term in 2020 in a process marred by violence. During elections, six armed groups combined to form a new alliance, the Coalition of Patriots for Change, led by former President Francois Bozize, exited ongoing peace ...

Companies developing standalone battery energy storage system (BESS) that Energy-Storage.news has interviewed unsurprisingly have a very different view. Georg Gallmetzer, managing director of developer ECO STOR, also an exhibitor at the event, said the business case had improved recently despite several headwinds. Florian Mayr, partner at clean energy ...

The Winners Are Set to Be Announced for the Energy Storage Awards! Energy Storage Awards, 21 November 2024, Hilton London Bankside. ... SECI launches 1,000MW/2,000MWh standalone BESS tender, India's biggest to date. July 1, 2024 ... Large Scale Solar Central Eastern Europe 2024. November 26 - November 27, 2024.

Scotland's "largest" standalone battery energy storage asset now operational. By George Heynes. April 27, 2023. Facebook Twitter/X LinkedIn Email Image: Eelpower. SUSI-Eelpower, a joint venture between SUSI Partners and Eelpower, and EDF Energy have brought Scotland's "largest" standalone battery storage asset online, the companies ...

The Bulgaria's Ministry of Energy began accepting applications yesterday (21 August) in tenders for

3,000MWh of energy storage capacity. Called the National infrastructure for the storage of electricity from renewable sources (RESTORE), the programme seeks battery energy storage system (BESS) resources that will go into operation by March 2026.

e-STORAGE will utilise its SolBank 3.0 technology for the Australian project. SolBank is a lithium iron phosphate (LFP) battery cell-based system that launched in 2023 and features a multi-level fire detector, alarm and extinguishing system to mitigate thermal risks.

Despite the major focus by media and publics on a handful of refugee crises around the world, displacement situations worsened during 2018 in a number of countries that received much less attention, including the Central African Republic, Democratic Republic of the Congo, and South Sudan--where unending conflict, new displacement, rising starvation, and an Ebola outbreak ...

The African Power Platform aims to connect private and government stakeholders in Africa's power sector. The platform helps circulate and propagate tenders, intelligence and business opportunities to its members. Developers, power producers, ministries, utilities, regulators, financiers, and other like-minded individuals can join APP to share possible solutions and ideas ...

Country profile of the Central African Republic, including its geography, climate and government. Statistics about population, land area, country codes and GDP. ... The technical storage or access is strictly necessary for the legitimate purpose of enabling the use of a specific service explicitly requested by the subscriber or user, or for the ...

PV Tech has been running PV ModuleTech Conferences since 2017. PV ModuleTech USA, on 17-18 June 2025, will be our fourth PV ModuleTech conference dedicated to the U.S. utility scale solar sector.

The Accelerating Battery Storage for Development program is intended to leverage US\$4 billion in new investments, and to support projects for utility-scale solar parks with battery storage, off...

As costs of renewables drop significantly, intuitively it will get easier to ramp down fossil fuel installs and in parallel hybridization using integration of renewables, battery energy storage...

Copenhagen Infrastructure Partners (CIP), through its flagship fund CI V, has acquired the 255MW/1020 megawatt hours (MWh) Scatter Wash standalone battery storage project in Phoenix, in the US state of Arizona.
