How many solar sites will Manx Utilities have?

Working with the Department of Infrastructure, Manx Utilities has identified over 30 sites suitable to deliver a total of 30 Megawatts of solar power on the public estate. The first phase of solar installations will see five projects being progressed with more sites to be identified to reach the 10 Megawatt objective.

What does a solar energy specialist do?

Specialists in the Design, Installation, Servicing and Maintenance of Solar PV Systems, Tesla Battery Storage Systems, Electric Car Charging Stations, Solar Thermal, Air and Ground Source Heat Pumps, Combined Energy Reports (Air Tightness Testing & Thermography), Mechanical & Electrical Services.

Do solar panels need to be south facing?

Solar panels need to be south facing for maximum exposure. Is your property surrounded by trees or buildings that may cast a shadow over solar panels - this can significantly reduce the amount of electricity generated. And, of course, is your roof structurally sound? Not only will it have to support the solar panels but also the fixing frames.

What are the benefits of solar power?

There are many reasons to tap into this otherwise wasted power. From an economic perspective solar can save you money, 7 to 11 year payback is normal on 6 to 10 kWp systems. Consider also the environmental benefits such as less polluted air, clean air really is priceless.

Douglas council is to start producing its own sustainable solar energy. The local authority has approved funding for a solar farm to power some of its facilities. The generation facility would be built in Braddan and have a life span of around 20 years. It's thought the savings will mean it'll effectively pay for itself within five to seven years.
