

Are smartflower solar panels expensive?

Most of Smartflower's beautiful and unique sun-tracking solar sculptures aren't purchased by homeowners. Cost is a big reason. Smartflower solar panels unfurl in the morning and track the sun across the sky. In a world filled with countless rectangular solar panels, Smartflower is a rare, novel solar product.

What is a smartflower Solar Flower?

The Smartflower solar flower is an all-in-one ground-mounted solar system with a tracker that follows the sun. However, it doesn't look like the solar panels you might be used to. Learn all about the product, how it compares to other solar options, and whether you should consider one for your home in our Smartflower solar review.

Does a smartflower produce more electricity than a solar panel?

Thanks to this tracking capability, the Smartflower can produce significantly more electricity than a similarly-sized rooftop solar panel system - up to 40 percent more, according to Smartflower's website.

Why should you choose smartflower solar panels?

The Smartflower's unique design allows for natural cooling of its solar panels resulting in as much an additional 10% increase in productivity.

Where is smartflower Solar Flower installed?

However, it has been installed at a handful of U.S. houses and organizations like the Detroit Zoo and Mary Baldwin University. The U.S. division of Smartflower is currently based in Boston, Massachusetts. How is the Smartflower solar flower different from other solar options?

What are smartflower solar units?

The innovative and visually striking Smartflower solar units, which mimic the sun-tracking movement of real flowers, are rarely seen in residential settings, largely due to their substantial price point.
