

Burt County Public Power and Bluestem Energy Solutions agree to preliminary terms and price on a solar plus storage generation project, locally generated and locally consumed. burt-public-power-solar-storage-press-release-8.12.2019.8.16a-002.

The USDA is providing the developer, Bluestem Energy Solutions, with a loan that is 40% forgiven. Bluestem Vice President Will Crane said the partially forgivable loan is a big reason why his company is building the solar facility in Madison. After the facility is built, Bluestem will sell the electricity generated to the City of Madison ...

Bluestem Energy Solutions and Southern Public Power District introduce a newly operating 5.64 MW wind project in Franklin County, Nebraska.... [View Post](#) » Up-Close Look: Bluestem and Burt County Solar-Plus-Storage Project

The project is a public-private collaboration between the City of Seward and Bluestem Energy Solutions. This new wind turbine will interconnect directly into the City of Seward's power distribution network with all the generated electricity being used locally. This project is expected to power approximately 600 homes in the vicinity.

In 2012, President Jon Crane founded Bluestem Energy Solutions to independently develop renewable energy solutions for public utilities, municipalities, and investor utilities. Bluestem developed its first wind project in ...

Bluestem is happy to share Research and Development Engineer, Srikanth Madala recently presented his white paper: "The Story of a Rural Public Power District- Before and After Distribution Grid Connected Wind Power Generation" at the 2019 IEEE Rural Electric Power Conference.

Courtesy of Bluestem Energy Solutions. The wind turbine is connected in-front-of-the-meter to CCPPD's 8.2 MVA Northeast Wisner substation, which is less than a mile and a half away. A step-up transformer at the wind turbine's base converts the turbine's native 690 V to 34.5 kV. The 34.5 kV collection system utilizes the road right-of-way ...

vast majority of the utilities have adopted 100% clean energy goals. The Project is needed to meet the growing demand for energy production from environmentally friendly and renewable resources. Bluestem, and similar solar energy facilities, are essential to achieving the sustainability goals of Nebraska. Each solar energy facility that can be ...

We look to support and strengthen each community we operate in by generating clean energy, protecting the

local ecosystem, and leaving a positive impact on the local economy. Working with Bluestem provides communities with clean ...

Battery Energy Storage Systems (BESS) enable energy from renewable energy sources, like solar and wind, to be stored and released when customers need power. Even if the wind isn't blowing or the sun isn't shining, battery storage enables utilities to continue to provide power during peak demand. Here's how it works: 1. CHARGE

Franklin County, Nebraska-- 8/29/2022--Bluestem Energy Solutions, in partnership with Southern Public Power District, has completed a two-turbine wind project in northern Franklin County, Nebraska. Constructed ...

By using trusted, cutting-edge technology and making responsible design choices, Bluestem facilities result in reliable energy projects that maximize value to each utility. Empowering communities and serving our partners through ...

Bluestem Energy Solutions announces its launch of the Bluestem Renewable Energy Scholarship starting in the fall of 2022. The new scholarship is exclusively aimed at Northeast Community College students with an interest in career paths in ...

Norfolk, NE-- 11.2.2021-- Bluestem Energy Solutions, a developer, owner, and operator of renewable energy generation projects, has announced that it... View Post » Up-Close Look: Bluestem and Burt County Solar-Plus-Storage Project

Bluestem is a developer, owner, and operator of renewable energy resources for our utility partners with an office located in downtown Norfolk. Founded in 2012 in Omaha, Nebraska, Bluestem provides affordable, reliable, and sustainable ...

See the article below for an exclusive Q& A session about the Burt County solar-plus-storage project featuring Mitch Hyde, Bluestem's Director of Operations and Maintenance, and Josh Moenning, Bluestem Energy Advisor and Mayor of Norfolk, Nebraska.
