Botswana is rich in natural resources and has vast solar energy potential, receiving over 3,200 hours of sunshine per year. Even though Botswana possesses vast coal resources, the nation's ambitions to drive a renewable energy transformation is clear to see.

Understanding Italy-Botswana of 11 December 2015. The study is a first exploration of the potential of renewable sources market in Botswana using available databases and taking into account the technical features and costs of commercially available technologies.

Despite all these efforts by the government of Botswana and donor agencies, the level of use of PV solar systems for power generation in Botswana, particularly in isolated communities, is very low. This paper, therefore, discusses the factors that impede the rapid development of photovoltaics power generation systems in the rural environment of ...
