

ASPO ENERGY has diversified its business to trading in a wide spectrum of commodity products including crude oil, refined oil products, petrochemicals, natural gas, LNG, power, coal, carbon emissions, freight, iron ore, base ...

We are trading in - Lithium It is an undisputed fact that climate change and the danger posed by carbon emissions to the environment is the most pressing problem faced by our planet. People and governments have understood that there is little time left to address and reverse this phenomenon. That is why we have seen more legislation restricting carbon emissions, and ...

We are trading in - Virgin Oil D6 D6 is a type of residual fuel, mainly used in power plants and larger ships. The fuel requires to be preheated before it can be used. It is not possible to use it in smaller engines or vessels/vehicles where it is not possible to pre-heat it. D6 is its name in the USA. In other parts of the world it has other names. Residual means the material remaining ...

We are trading in - Base Oil N70 Pure Performance 70N is a high purity, low viscosity paraffinic oil produced from a high-pressure hydrocracking and hydro-dewaxing process that removes virtually all metals, sulfur, and nitrogen from the feedstock. Customers purchase Pure Performance 70N for a wide variety of uses, including use as a process oil, ATF formulations, ...

We are trading in - D2 Diesel Gas Oil D2 is a refinery abbreviation for Gasoil. It is the second distillate from the crude oil, and can be used without reformers and additives. So, the first engines used D2 as fuel -- before petrol cars as we know them today was invented. That is because the engine invented by a German called Diesel, requires no spark plugs. The diesel engine will ...
