

How does the Energy Conservation Act work in Thailand?

It promotes energy efficiency and conservation, providing incentives for renewable energy development. The Act encourages the adoption of sustainable energy practices among businesses and consumers, offering financial and policy support for initiatives that align with Thailand's energy conservation goals.

How important is Thailand's energy system?

Transforming Thailand's energy system is critical to meet Thailand's climate goals, as the energy sector accounted for 69% of Thailand's total GHG emissions in 2018, as well as broader development objectives, including access to affordable energy and job creation.

What is Thailand's energy transformation plan?

The project is a prime example of the energy transformation underway across Thailand, as the nation sets a new renewable target of 30 percent of total final energy consumption by 2036 in its Alternative Energy Development Plan.*

What will Thailand's energy transition look like in 2036?

Another key transition, significantly driven by the government, is the introduction of the Alternative Energy Development Plan (AEDP) 2015-2036. This pivotal policy sets a target for renewable energy to comprise 30% of Thailand's total energy consumption by 2036.

Is Thailand a good place to invest in solar energy?

Thailand has made significant strides in solar energy, with numerous large-scale solar farms. The FiT scheme has been pivotal in encouraging investment in solar projects, making them a lucrative option for renewable energy companies. These farms not only contribute to the energy mix but also exemplify Thailand's potential in harnessing solar power.

Can the Thai power system reduce its emissions?

Building upon the current PDP, this report analyses how the Thai power system can decrease its emissions to meet the targets by increasing the amount of wind and solar PV in its system, and how it can integrate these variable renewable energy sources efficiently.

At the same time, for industry-user segment, SCG has developed and offering SCGC Floating Solar Solutions, Thailand's first end-to-end service starting from design, float production, installation, and maintenance. In 2018-2022, the ...
