

What is a GSE in roof system?

The special feature of the IN-ROOF SYSTEM is that the solar panels are built into the roof and replace part of the tiles. This means that the roofs maintain their appearance whilst producing sustainable energy. KemkensSolar chose the GSE IN-ROOF system as it adapts to different types of solar panel, is lightweight and is proven to be watertight.

What does a consortium of Dutch solar companies do?

A large consortium of Dutch solar companies aims a leading position in the solar industry in Europe. The companies joint forces in SolarNL. The aim is to build several plants in a few years, building on ambitious innovation programmes. In doing so, the companies are working closely with research organisations.

Why should you choose GSE integration?

Since then GSE Integration has proven to be a very reliable partner with good communication, good availability, good service and high quality products. I really value our partnership and our goal is to continue to make the world more sustainable and houses more beautiful at the same time.

Why do you choose BIPV from GSE integration?

We choose BIPV from GSE Integration because they are a reliable partner with a steady supply. We like the way GSE Integration is making it possible to get a nice in-roof product for a reasonable price. Products are easy to work with.
