Energy Vault sells the product on longevity: Batteries degrade, but if a G-Vault works for 35 years, the levelized cost of storage goes down. This requires selling to the sorts of companies willing to sink money into novel assets with a longer promised life expectancy than the well-understood lithium-ion options.

Energy Vault's approach to ultra long duration emphasizes the use of Hybrid Energy Storage Systems (HESS) to leverage the relative strengths of multiple technologies. Our dedicated research team has expertise encompassing a broad range of renewable generation, hydrogen, fuel cell, and battery technologies. ...

Energy Vault's customer-centric, solutions-based approach enables short-duration project developers to utilize a range of hardware options--including proprietary enclosure innovation; technology-agnostic software, and long-term service agreements.

Energy Vault is a global energy storage company specializing in gravity and kinetic energy based, long-duration energy storage products. Energy Vault's primary product is a gravity battery to store energy by stacking heavy blocks made of composite material into a structure, capturing potential energy in the elevation gain of the blocks. When demand for electricity is high, these blocks are lowered...
