

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Does Timor Leste have a country Factsheet?

Specifically for Timor Leste, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

Is a solar-powered Grid a good idea in Timor-Leste?

With the new UN reforms, the United Nations in Timor-Leste, under the leadership of the Resident Coordinator has now started lighting the way with its solar-powered grid which has begun to give maximum dividends. A powerful 300 kWp photovoltaic system is producing 400,000 kWh of clean electricity annually, filling critical gaps in energy supply.

How long does a solar system last in Timor-Leste?

High electricity costs and readily available solar radiation mean that the average payback period for a rooftop photovoltaic (PV) solar energy system in Timor-Leste is only 1.5 to 3 years instead of the global average of 6-10 years. Transitioning to solar can also help the country meet environmental commitments.

Does Timor-Leste have access to energy?

Access to energy remains a concerning challenge for many in Timor-Leste. The centralised nature of the local electricity supply chain has traditionally kept consumers reliant on the national grid to overcome chronic energy shortages.

With the new UN reforms, the United Nations in Timor-Leste, under the leadership of the Resident Coordinator has now started lighting the way with its solar-powered grid which has begun to give...

East Timor solar project, Timor Leste. In cooperation with our local partner, GSOL Energy technicians have installed a 300kWp on-grid solar PV system, which covers 50% of the annual electricity consumption of the UN House, and is expected to reduce CO2 emissions by ...

With the new UN reforms, the United Nations in Timor-Leste, under the leadership of the Resident

Coordinator (RCO) has now started lighting the way with its solar-powered grid which has begun to give maximum dividends.

The Pacific Green Transformation Project, supported by the Government of Japan and implemented by UNDP, not only provides lights but also illuminates the path towards a brighter future for the youth of Timor-Leste. Despite the challenges posed by climate change, the resilience and determination of these communities shine through.

Energy-efficient solar systems in the UN Compound in Timor-Leste are helping cut down costs of nearly US\$ 542,490 and save 1765 tons of CO₂ over the last six years. The switch to clean energy, a critical part of UN reforms ongoing in the country, is the largest renewable energy initiative undertaken in Timor-Leste, paving the way for other ...

East Timor solar project, Timor Leste. In cooperation with our local partner, GSOL Energy technicians have installed a 300kWp on-grid solar PV system, which covers 50% of the annual electricity consumption of the UN House, and is ...

The United Nations Development Programme (UNDP) has launched a groundbreaking initiative aimed at providing sustainable solar energy to remote communities in Timor-Leste. The project, which was officially announced a few months ago, seeks to address the energy access challenges faced by rural populations - particularly in areas that are not ...

The project, with total funding of 37.5 million USD by the Government of Japan, targets 4 Small Island Developing States (SIDS), Timor-Leste, Papua New Guinea, Samoa, and Vanuatu, to advance climate action through innovation and help communities build resilience, and adapt to climate risks, by providing access to renewable energy to rural ...

Specifically for Timor Leste, country factsheet has been elaborated, including the information on solar resource and PV power potential country statistics, seasonal electricity generation variations, LCOE estimates and cross-correlation with the relevant socio-economic indicators.

3 ???· As Timor-Leste moves toward prioritizing more climate-friendly development, clean energy is providing empowerment and opportunity for its people. With solar lights in their homes, women across the country can dream bigger, feel safer, ...
