

How to transport solar panels?

Usually, to transport solar panels, a pallet is used. Here is how a good company packs it:

- o First panels go on the pallet bottoms up and the last one is placed front side up.
- o Corner protectors and foam pads across the frame are added.
- o Usually a piece of cardboard or plastic is placed in between every two panels.

How do you ship a solar panel?

Inspect the solar panel before shipping for any apparent damage. Pack your panels vertically. It will reduce the stress to modules, and pallets are secured with separators to ensure the safety of panels. Place the sunny side (front side) facing the pallet. Put foam pads around the frame of the solar panel. Have the last solar panel sunny side up.

Are solar panels safe to transport?
