

Could tri-generation be a solution for industrial parks?

Tri-generation could be an answer. Essentially a combined cooling, heat and power solution, gas-fired tri-generation is ideal as a self-contained (off the grid) energy source for an industrial park, for example. A property developer could offer tenants a compelling proposition.

Is the Philippines a resilient energy system?

In the case of the Philippines, this mainly only considers efforts to storm-harden energy systems against typhoons and other natural disasters. However, other economic and socio-political factors should be considered to truly call an energy system resilient.

Can solar energy be used in the Philippines?

Adoption of solar energy in the Philippines aims to help the nation reduce its carbon footprint and reduce the cost of electricity for households and businesses. Finally, Todd Li states that "the Philippines is a market with strong potential to harness solar energy for both consumer use and power production.

Are sugarcane leaves a source of bioenergy in the Philippines?

[Google Scholar] [CrossRef] Go, A.W.; Conag, A.T. Utilizing sugarcane leaves/straws as source of bioenergy in the Philippines: A case in the Visayas Region. *Renew. Energy* 2018, 132, 1230-1237.
