

Will BP develop a natural gas field in Trinidad & Tobago?

BP plc (BP) and U.S. shale producer EOG Resources, Inc. (EOG) are reportedly in talks to develop a significant natural gas field off the coast of Trinidad and Tobago. BP confirmed the discussions, stating that the field has the potential to enhance its natural gas portfolio.

Does Trinidad and Tobago have a power generation capacity?

However, Trinidad and Tobago power generation capacity surpasses its current demand (Inter-American Development Bank, 2015), which provides avenues for energy storage through low carbon H₂, MeOH and NH₃ production directly within the local downstream supply chain.

Does Trinidad and Tobago produce electricity?

The authors greatly acknowledge the Trinidad and Tobago national electricity power producers for assisting in data collection and model verification. No funding sources were received for this study. Energ. J. (2018), 10.3390/en11061412

What does BP's partnership with EOG Resources mean for Trinidad & Tobago?

BP and EOG Resources' collaboration in Trinidad and Tobago signifies a strategic move to bolster gas production, ensuring continued supply for both domestic and international markets. This partnership supports BP's broader ambitions in the LNG sector.

What makes Trinidad and Tobago unique?

Trinidad and Tobago is heavily dependent on its oil and gas reserves (Fig. 3), petrochemical and other hydrocarbon related downstream industries (Indar, 2019). Thus, the country is unique amongst SIDS and must maximise its benefit from these natural resources, in terms of energy production.

What liquefied natural gas is being produced in Trinidad and Tobago?

This output is expected to supply Trinidad's premier liquefied natural gas (LNG) facility, Atlantic LNG, wherein BP and Shell hold a 45% equity stake each. Trinidad and Tobago is Latin America's largest LNG exporter and ranks as the world's second-largest exporter of methanol and ammonia.

We share a collective vision that Trinidad and Tobago's infrastructure is perfect for future hydrogen production and utilization. To drive the hydrogen economy more renewable energy is needed.

Perenco has completed the acquisition of BP's four mature offshore gas fields as well as one underdeveloped field offshore Trinidad and Tobago. The acquired assets include Cashima, Amherstia, Flamboyant & Immortelle offshore gas fields and associated production facilities, as well as the undeveloped resources from the Parang field (CAFI asset).
