

Is biomass a source of electricity in Turkmenistan?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Turkmenistan: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Why is Turkmenistan facing geopolitical competition?

Isolated but natural gas-rich Turkmenistan has recently become a subject of geopolitical competition owing to the energy crisis in Europe and Western energy sanctions imposed on Russia as a consequence of its invasion of Ukraine.

Should Turkmenistan export gas to Russia?

Turkmenistan, however, prefers to remain neutral and maintain positive relations with Moscow, which would be at risk if the country decided to export its gas to Turkey bypassing Russia. Moreover, Russia's plans to divert its trade and gas export routes towards Asian markets potentially offers a prominent role for Turkmenistan.

Why did Turkmenistan refuse to join OTS?

Turkmenistan's decision to refrain from joining OTS was met with approval in Moscow. Faced with Western sanctions and blocked access to Western markets, Russia needs new strategic partners and alternative trade and energy export routes. Hence Russia's recent overtures to Turkmenistan and efforts to deepen the strategic partnership with Ashgabat.

Is Turkmenistan a neutral country?

Although Turkey and Russia would gladly see Turkmenistan in international organizations under their auspices such as OTS or the Russian-led Collective Security Treaty Organization and Eurasian Economic Union, Turkmenistan has held on to the neutral status stipulated in its constitution.
