

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What is a floating solar PV system in Tuvalu?

From solar rooftops and the Off-grid solar-powered Capacitive Deionisation (CDI) systems to the pioneering floating solar PV with 100kW, innovative solutions like floating solar panels (a first for the PICs) and raised solar installations are being embraced in Tuvalu as the Pacific grapples with addressing the challenge of limited land space.

What was the first large scale solar system in Tuvalu?

The first large scale system in Tuvalu was a 40 kW solar panel installation on the roof of Tuvalu Sports Ground. This grid-connected 40 kW solar system was established in 2008 by the E8 and Japan Government through Kansai Electric Company (Japan) and contributes 1% of electricity production on Funafuti.

How much energy does Tuvalu use a year?

Like many Small Island Developing States (SIDS), Tuvalu has been heavily reliant on imported fuel for its diesel-based power generation system. Through this new FSPV system 174.2 megawatts per hour of electricity will be generated each year, meeting two percent of Funafuti's annual energy demand.

Where does Tuvalu electricity come from?

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).

How many inhabited islands are in Tuvalu?

It is somewhat complicated because Tuvalu consists of nine inhabited islands. The Tuvalu National Energy Policy (TNEP) was formulated in 2009, and the Energy Strategic Action Plan defines and directs current and future energy developments so that Tuvalu can achieve the ambitious target of 100% renewable energy for power generation by 2020.

Overview  
Tuvalu's carbon footprint  
Tuvalu Energy Sector Development Project (ESDP)  
Commitment under the Majuro Declaration 2013  
Commitment under the United Nations Framework Convention on Climate Change (UNFCCC) 1994  
Solar energy  
Wind energy  
Filmography  
Renewable energy in Tuvalu is a growing sector of the country's energy supply. Tuvalu has committed to sourcing 100% of its electricity from renewable energy. This is considered possible because of the small size of the population of Tuvalu and its abundant solar energy resources due to its tropical location. It is somewhat complicated because Tuvalu consists of nine inhabited

islands. The Tuvalu National Energy Policy (TNEP) was formulated in 2009, and the Energy Str...

The tiny Pacific Island nation of Tuvalu has a bold goal of 100% renewable energy by 2025, and Infratec has helped bring that a step closer with the commissioning of the country's first combined solar-battery power project this month.

In Funafuti, a small pond bordered by pig pens is now home to an innovative renewable energy pilot program, floating solar panels. Tuvalu Energy Corporation General Manager, Mafalu Lotolua says the project is a response to the ...

A new documentary film created through the Pacific Islands Greenhouse Gas Abatement through Renewable Energy Project (PIGGAREP) documents the life-changing potential of 24 hour solar power for communities living in the remote islands of Tuvalu.

The installation of Tuvalu's inaugural Floating Solar Photovoltaic (FSPV) system has been successfully completed, with this cutting-edge system seeing 184 solar panels positioned on Tafua Pond in Funafuti.

The installation of Tuvalu's inaugural Floating Solar Photovoltaic (FSPV) system has been successfully completed, with this cutting-edge system seeing 184 solar panels positioned on ...

The installation of Tuvalu's inaugural 100.28kWp Floating Solar Photovoltaic System (FSPV) consists of a total of 184 x 545W Sunergy solar panels with a solar floating mounting system. Through this new FSPV system 174.2MWh of electricity will be generated each year, meeting two percent of Funafuti's annual energy demand.
