How is energy used in Türkiye?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Why does Turkey need a long-term energy policy agenda?

Türkiye's reliance on natural gas use has grown along with rising oil and gas imports, leaving the Turkish economy increasingly exposed to the volatility in oil and gas prices. There is an identified need to set a longer-term energy policy agenda for 2030

Türkiye's new road map for renewable energy has received positive feedback in the sector, while nongovernmental organizations (NGOs) working in energy transformation and solar energy ...
