

In 2022, the United Kingdom's total energy supply (TES) was primarily composed of natural gas, contributing 39.4%, followed by oil at 34.8%, nuclear power at 8.1%, and coal at 3.2%. Biofuels and waste contributed 8.9%, while other ...

We are developing a family of onshore wind energy parks across Wales which, together, have the capacity to produce 2GW of clean, green energy - enough to power over 2.2 million homes. Ours is the largest single investment in onshore wind in Wales.

Nant Mithil Energy Park will tackle the climate crisis and make a greener economy by producing up to 205 megawatts of clean energy. The Energy Park will power between approximately 135,000 and 202,000 homes*, while displacing between approximately 200,000 and 300,000 tonnes of carbon dioxide* annually.

The project will link Bute Energy's Nant Mithil Energy Park, which could generate around 237MW of clean, green energy in the Radnor Forest area, to the National Grid. And it will reduce pressure on the existing electricity grid, supporting green businesses and enabling green heating and the roll out of electric vehicles across rural Wales.

Nant Mithil Energy Park. Bute Energy is a developer of onshore wind and solar Energy Parks, using the latest technology ... Guildhall Place, Cardiff, United Kingdom, CF10 1DY. The construction of Nant Mithil Energy Park is anticipated to take place between 2027 and 2029. The construction will be managed with a Construction and Environmental Management Plan (CEMP), which will be agreed with Powys County Council to ensure the project is developed in accordance with best environmental practices.
