

What was the energy grid like in Uruguay?

Uruguay's energy grid was powered almost exclusively by domestically created, renewable energy, and, adjusted for inflation, consumer prices had gone down. Today, there are more than 700 wind turbines installed across Uruguay's countryside. "It was absolutely a complete transformation," says Méndez Galain.

Why did Uruguay rethink its energy strategy?

In the 2000s, facing rising fossil fuel prices and energy demand, Uruguay was compelled to reconsider its energy strategy. Importing oil exposed the country to volatile global markets, as seen in the early 2000s when oil prices soared from \$20 to a record \$145 per barrel.

What is Uruguay's energy future?

His vision for Uruguay's energy future was to cover that empty land with hundreds of wind turbines. Today, wind power accounts for around 40% of Uruguay's energy production. And, according to a 2008 law, all the wind in the country officially belongs to the Uruguayan people.

Does Uruguay have a wind farm?

Cover Image: Wind energy supplies up to 40% of Uruguay's power needs. This wind farm, operated by the public utility UTE, is located in the southern Uruguayan department of Maldonado. Credit: UTE

Why did Uruguay change its energy policy?

This volatility strained Uruguay's economy, forcing then-President Tabaré Vázquez to import energy at premium prices due to increasing household energy demands. This challenge led to a revolutionary shift in Uruguay's energy policy under the guidance of physicist Ramón Méndez Galain, who transformed the nation's energy grid.

Could Uruguay be a leading exporter of hydrogen?

Uruguay has also created a green hydrogen generation roadmap, which could position the country as a leading exporter of the gas, generating \$2.1 billion in revenues and up to 34,000 jobs by 2040, according to Bloomberg.

Hawker® sealed lead acid batteries, manufactured by EnerSys, the global leader in energy storage solutions, have been at the forefront of innovation and technical excellence for more than 40 years. They have evolved and advanced to deliver the improved power and performance required by successive generations of aircraft.

ENERGY-PLUS (TM) VERSUS BATERÍA ESTÁNDAR ENERGY-PLUS(TM) provee hasta el 20% más de energía que las baterías estándar. Si desea identificar la solución de sistema de tracción HAWKER® ideal para sus necesidades, llame al 01.423.238.5700 para
