

How is electricity distributed in Vietnam?

The charges and conditions for the distribution of electricity are highly regulated by the Vietnamese Government. Power generators and the purchaser can agree on the electricity generation prices and electricity wholesale prices.

Who regulates the price of electricity in Vietnam?

The price for electricity at the consumer level is regulated by the Vietnamese Government. The MOIT periodically promulgates the retail price of electricity to groups of electricity users and the electricity price for retailers.

Does Vietnam have a monopoly on electricity?

Customers. However, state-owned Vietnam Electricity (Tập đoàn Điện lực Việt Nam) (EVN) still has a monopoly over electricity transmission, distribution, wholesale, retail, and regulation. Power generation is the only segment involving other corporate participants and therefore having a competitive market structure.

Does Vietnam import electricity from China or Laos?

Recently, Vietnam has mainly imported electricity from China and Laos. To ease power shortages in the north, Vietnam signed its first power import contract with China in October 2005, at a price of 4.5 US cents/kWh. The price was increased to 5.1 US cents/kWh on 1 January 2009, and to 6.08 US cents/kWh in 2012.

What are Vietnam's energy policies?

Vietnam's policies are to liberalise the electricity market and encourage foreign investors to invest in the market (see Question 24). The energy sector in Vietnam is currently mainly managed by the government through the MOIT and provincial People's Committees. 3.
