

How much did wassha raise?

Tokyo-based Wassha, building a retail platform by networking local kiosks in rural Africa, announced on Friday that it has raised \$1.14 billion yen (about \$8.2 million US) in a series C round.

Who invested in wassha?

UTEC also participated in Wassha's series A and series B rounds while Daikin Industries, Mistletoe Japan, and Yamaha Motor follow on their investments from the startup's series B round. The latest round brought their funding sum up to date to approximately 3.5 billion yen (about \$26 million yen).

What is solar power industry in South Korea?

South Korea's limited land area has encouraged the development and export of advanced solar panels that are space-efficient, making it home to strong contenders in the global solar panel market, such as Hanwha Solutions and OCI. Discover all statistics and data on Solar power industry in South Korea now on [statista.com](https://www.statista.com)!

Why should you choose wassha?

Through such process, we empower customers, partners and the people related to our company WASSHA believes that everyone can change their future for the better. We will not create limits for ourselves and neither for others - we will continue to accompany their journey and strive in our own endeavour, because we believe in endless possibilities.

What makes Hanwha Solar arrays different from other solar panels?

The arrays use Hanwha's latest technology, specially adapted for water, with greater resistance to humidity and heat, according to the company. Hanwha, Korea's biggest producer of photovoltaic modules, is now working on a 63-megawatt floating plant on Goheung Lake in the south of the country, which would be the nation's biggest.

Does South Korea need a solar power plant?

While solar is South Korea's leading renewable-energy source, with 21 gigawatts, the nation will need at least 375 gigawatts to reach net zero, according to the Green Energy Institute. "Even with the help of floating-solar plants, South Korea has a long way to go and little time to tackle the climate crisis," said Greenpeace's Kim.

The Sinan Solar PV Park is a 150MW solar PV power project located in South Jeolla, South Korea. Post completion of construction, the project was commissioned in 2022. The project was developed by Korea South-East Power. Korea South-East Power own the project. Buy the profile [here](#). 2. KOSPO-Hadong Solar PV Park I
