

Wind loads act simultaneously on the parafoil and cables, taking the form of aerodynamic drag and lift. The effect of wind loads on the parafoil is significant, and this is also ...

The paper explores options for a 2050 carbon free energy future for India. Onshore wind and solar sources are projected as the dominant primary contributions to this objective. The analysis ...

Secular decrease of wind power potential in India associated with warming in the Indian Ocean Meng Gao^{1*}, Yihui Ding², Shaojie Song¹, Xiao Lu^{1,3}, Xinyu Chen^{1*}, Michael B. McElroy^{1*} ...

Wind power generation is affected by weather and historical wind power, which presents the characteristics of instability and high volatility. Most wind power prediction models ignore ...

Download Citation | On Jul 16, 2023, Xinyu Liu and others published Rapid Estimation of Temporary Overvoltage for Heterogeneous Wind Power-integrated System | Find, read and ...

Xinyu Long; Mingwei Sun; Zengqiang Chen; View. ... The high-altitude wind power generation (HAWPG) parafoil is an innovative generator with remarkable environmental benefits. Due to ...

Offshore wind power may play a key role in decarbonising energy supplies. Here the authors evaluates current grid integration capabilities for wind power in China and find that ...

A large-scale renewable photovoltaic-wind-concentrating solar power hybrid system integrating an electric heating device is proposed to provide a sustainable power for a domestic region.

The high-altitude wind power generation (HAWPG) parafoil is an innovative generator with remarkable environmental benefits. Due to the unique trajectory shape, there is an inherent ...
