

What is solar energy potential in Uzbekistan?

The solar energy gross potential totals 2.134×10^3 PJ, while technical potential is estimated at 411.7 PJ, which is equivalent to almost four times the country's current primary energy consumption (Table 1). Table 1 Renewable energy source potential in Uzbekistan

Will Uzbekistan be able to deploy solar energy by 2030?

After discussing the possible barriers to the deployment of solar energy in Uzbekistan, the report presents a roadmap for solar energy by 2030. It provides examples of international best practices in solar energy deployment from IEA member and association countries.

Does Uzbekistan have a solar revolution?

Uzbekistan's solar revolution has continued with the commissioning of a 100 MWac project by French developer Total Eren near Samarkand. The last set of figures published by the International Renewable Energy Agency indicated the central Asian nation soared from just 4 MW of grid connected solar capacity at the end of 2020 to 104 MW a year later.

Can floating solar PV increase solar PV capacity in Uzbekistan?

For comparison, the area of the hydropower reservoirs are more than 15 times the size of the world's largest solar park in India, which has an installed capacity of 2.25 GW. In this regard, the potential of floating solar PV on the hydropower reservoirs is a realistic opportunity to further increase solar PV capacity in Uzbekistan.

Will a 100 MWAC totally solar field double Uzbekistan's solar capacity?

The 100 MWac Total solar field developed by Total Eren near Samarkand, in Uzbekistan, will almost double the nation's solar capacity single-handedly. Image: Total Eren Uzbekistan's solar revolution has continued with the commissioning of a 100 MWac project by French developer Total Eren near Samarkand.

What is solar energy policy in Uzbekistan?

This Solar Energy Policy in Uzbekistan Roadmap is part of the EU4Energy programme, a five-year initiative funded by the European Union. EU4Energy's aim is to support the development of evidence-based energy policy design and data capabilities in Eastern Partnership and Central Asian countries, of which Uzbekistan is a part.
