

Does Zimbabwe have a good energy supply?

Zimbabwe's coal supply significantly contributes to its energy provision, accounting for 12.9% of the total energy supply in 2021. Coal is a widely exchanged fossil fuel, and its burning is accountable for many global CO<sub>2</sub> emissions. Figure 2 shows Zimbabwe's position in both African and global ranking across different indicators.

How many coal-powered thermal stations are there in Zimbabwe?

There are about four coal-powered thermal stations in the country, namely Munyati Power Station, Harare Power Station, Bulawayo Power Station, and Hwange Power Station, which have operated since the country gained independence approximately 50 years ago (Government of Zimbabwe, 2019).

What is Zimbabwe's primary issue in its energy sector?

Zimbabwe's primary issue in its energy sector's inadequate and aging infrastructure continues to be a challenge.

Does Zimbabwe produce hydrogen?

Presently, Zimbabwe does not engage in extensive hydrogen manufacturing. However, the primary emphasis lies on the advancement of green hydrogen production, which involves harnessing renewable energy sources such as solar and hydropower.

Should Zimbabwe invest in solar energy?

In the last couple of years there has been an increased focus on solar energy. Zimbabwe has solar irradiation averaging 20 MJ per m<sup>2</sup> and 3000 hours of sunshine per year. Its location and climate provide a lucrative opportunity for investment in solar energy technology and the government is looking to provide incentives to leverage in the sector.

Who owns Kariba Power Station?

The Power Station has long been a cornerstone of Zimbabwe's electricity generation, providing a significant portion of the country's power supply as it is owned and operated by the state-owned Zimbabwe Power Company (ZPC). The Kariba plant facility initially comprises an underground powerhouse with six vertical shaft turbine units.
